#### **Construction characteristics**

- Body, adjust. mechanism, AISI 316L stainless steel and caseback inter. components
- AISI 316 stainless steel adjustment springs.
- Fixing screws, adjustment screws and locknut in A4 (AISI 316) stainless steel.
- Filter-pressure regulator diaphragm with over-pressure drain (Relieving).
- Low hysteresis rolling diaphragm.
- Balanced system.
- Manual or automatic condensed drain.

Note			

The pressure must be always regulating while increasing. For a more precise

regulation and higher sensibility, the use of a regulator with a pressure range as

close as possible to the regulated pressure is recommended.

Technical characteristics

Maximum inlet pressure (standard version)

Temperature (standard version)

Temperature (low temperature version)

Temperature (high temperature version)

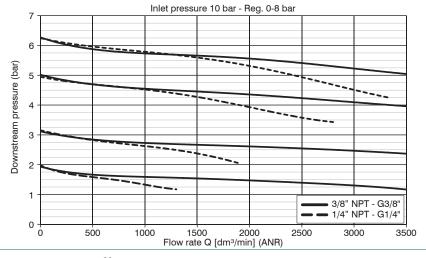

Temperature (low temperature version -60°C)

Maximum inlet pressure (automatic drain version)

Maximum inlet pressure (reduced orifice automatic drain version)

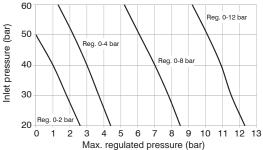

Temperature (automatic and reduced orifice drain version)

# Flow rate chart

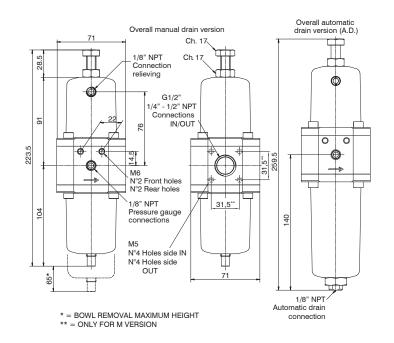

Pressure regulator Stainless steel line have been designed to withstand a 60 Bar maximum inlet pressure.

Maximum regulated outlet pressure is 20 Bar. For performance details please refer to diagram alongside.
